

PAYMENTS

# Get paid faster

## Tailor payment policies to meet your business needs

Billtrust Payments automates the entire payment lifecycle, from acceptance to cash application. Built to meet the needs of all your buyers, our solution offers a wide variety of payment modalities including EFT, credit cards, virtual cards, SEPA Direct Debit, and other common international payment modalities, all while automating remittance capture directly into your ERP system.

With our solution, you have the flexibility to customize payment policies to meet the particular needs of each of your customers. You can set configurable rules by customer segments and your business goals, which allows you to optimize working capital, reduce costs, and improve the buyer experience.

"Almost immediately following our Billtrust implementation, we saw excellent customer acceptance to pay through our portal. It's provided a great experience for our customers as well as employees. What was taking our team hours a day to reconcile payments now just takes minutes!"

**Tim Mikesic, CFO, Ward Transport and Logistics**

### Accelerate cash flow

Get paid faster with automated payment processing.

### Enhance buyer experience

Customers pay when and how they prefer.

### Reduce costs

Eliminate or lower the cost of accepting cards.

### Customized payment policies

Use business rules to offer early payment discounts, surcharging grace periods, card exclusion lists, autopay, and/or lump sum payments with remittance attachments.

### Multiple payment modalities

One platform spanning all payment methods including EFT, Direct Debit, credit cards and virtual cards.

### Digital lockbox for virtual card capture

Automate processing of virtual cards from any AP provider.

### Days to Pay Index

Gain insights on how your organization is performing against benchmarks.
