

# Sharing trade information securely and privately

Recently, the world has seen an increase in what might be called matters of trust. Especially when it comes to supplier relationships in extending trade credit, the role of trust has become more visible and important.

Billtrust's Credit solution is a global, secure and private network of suppliers where the trade payment experiences and peer-to-peer alerts on common customers are aggregated in real-time and with higher transparency, so you can make credit decisions faster and with confidence. After making peer connections within the private community, you'll receive timely, relevant and accurate updates from your industry peers' that you won't find from a traditional credit source.

It's also safe because you only share trade with your most trusted connections and can choose to be anonymous if preferred. Most importantly, your peers never see your entire customer list and unlike most bureaus, we do not display your individual trade lines in a credit report unless it's from a trusted peer.

## Our community offers unmatched value in credit risk monitoring

With our comprehensive portfolio-monitoring tools, timely alerts and advanced analytics, you can stay update-to-date on bankruptcies and financial distress. Receive relevant trade information from trusted peers combined with high-quality third-party data. You can also analyze and benchmark your organization's financial performance against others in your industry.

Through a secure, trusted network of peers and validated trade data, we help you make smarter credit decisions faster.

## Who trusts us today?

- **96 percent** of our growing community of industry-leading creditor firms are sharing trade experiences through the platform
- **2,000 users** active in the community connecting and sharing references on over 30M active businesses
- **250 million businesses** around the world covered through our bureau partnerships
- **Over \$700 billion** in receivables managed
